

CLAIMS

We claim:

1. Seal device for a cooking utensil called couscous pan for preparing couscous, including a lower part (30) having the shape of a pan and an upper part (31) having the shape of a receptacle with a bottom with holes, characterized in that it consists of a strip (2) of natural or synthetic plastic, shaped into a tube portion, aimed at externally covering the junction area (J) between the upper part (31) and the lower part (30) of the couscous pan (3).
2. Device according to claim 1, characterized in that it includes means (23) capable of allowing its adapting to upper parts (31) of varying shapes.
3. Device according to claim 2, characterized in that the means capable of allowing its adapting to upper parts (31) of varying shapes consist of at least one external peripheral groove (23) or the like.
4. Device according to any of the preceding claims, characterized in that it includes, externally, gripping means (22).
5. Device according to claim 4, characterized in that gripping means consist of tongues (22) protruding outwardly.
6. Device according to any of the preceding claims, characterized in that it is made of latex or a similar synthetic material.
